

LAPTOP CADDY

Side View

End View

Laptop at the Ready

Materials

- $\frac{3}{4}$ -inch PVC pipe
- 8 $\frac{3}{4}$ -inch Tees
- 8 $\frac{3}{4}$ -inch Ells

Instructions

Construct the base first. Then the two “uprights” and connect.

This caddy fits my Toshiba perfectly and should be fine for most laptops. However, you may need to adjust some of the pipe lengths for your own use.

For a nice finishing touch, paint the project a happy color (see *How to Clean PVC Pipe* and *How to Paint PVC Pipe*).
